

 Print2PACS™

Print2**PACS**™ lets you print documents or images from any Windows 2000 or XP application that supports Windows printing. Eliminates paper, improves workflow and provides access to important clinical documentation, such as Microsoft® Word documents, PDF, reports, email, EHR/EMR and RIS information.

Print2**PACS** is software that appears as a printer selection within your application. Select “Print2**PACS**” and print documents to PACS as you would print on paper. Cath labs, cardiology and DEXA/BMD scanners are just a few of the application areas where Print2**PACS** can help. In PACS, view documents along with patient studies at the point of care.

It’s as easy as clicking File > Print > Print2PACS

Why Print2PACS?

- ✦ **Easy** – No training required
- ✦ **Fast** – Send Windows-printable documents to PACS in less than one minute
- ✦ **“It just works”** – Include Microsoft Word, PDF, reports, email, EHR/EMR, and RIS information in PACS

How it works... As easy as 1, 2, 3!!!

1. From your Windows application, select **File > Print** and then select "Print2PACS" as the printer

2. Select patient/study demographics from your RIS or DICOM archive and click "Continue" to print the document directly to PACS

3. The document is now matched with the appropriate study

Print2PACS Features

- Interfaces to RIS worklist or DICOM Archive to provide automatic loading of patient demographics for ease-of-use. DICOM Modality Worklist (MWL) ensures an accurate match of scanned documents with patient studies.

- Simple user interface allows anyone to add documents without prior knowledge of PACS. No training required.
- Allows import of documents or images from any Windows 2000 or XP application that supports Windows printing, including Microsoft® Word documents, PDF reports, email, EHR/EMR and RIS information

- Automatically invert any image during printing to reduce display glare
- Configure Print2PACS to convert all printed pages to grayscale, saving valuable storage space
- Easily set the DPI to change the size and quality of all printed output sent to PACS

Need electronic forms or document scanning? Consider Pacs**SCAN** – industry leading document scanning software
